

# INDUSTRIAL PH PLYWOOD

Structural and multi-purpose  
French plywood panel

**Industrial PH Plywood** is the robustness par excellence. Combining price and performance, this panel complies with current technical and environmental standards.

## HIGHLIGHTS

- Strong impact and bending resistance
- Phenolic bonding: EN 314 - 2, class 3 (collage for wetlands)
- Good sound and thermal insulation thanks to its composition

## STANDARD SIZES

- 2500 x 1500 mm
- other formats (contact us)
- Thickness: between 15 and 70 mm
- Custom cutting and dimension stock
- Density: 750 kg/m<sup>3</sup>

## FOR WHAT PURPOSE?

- Interior arrangements and design (floor, stair steps, workbenches, etc.)
  - Bodywork
- Formwork, construction industry
  - Industrial packaging
- Events (exhibition floor, etc.)

## COMPOSITION AND SOURCES

- 100% beech, from managed forests in the French regions of Grand Est or Bourgogne Franche Comté
- Standard faces: C+ to C+ (not exhaustive)

## BEECH, A GUARANTEE OF RESISTANCE

It is a hard wood, dense and very durable. As a matter of fact, its high resistance to impact, compression and bending is excellent. Beech plywood offers great mechanical performance guarantee.

## ACCREDITATIONS

- PEFC and FSC certified: These labels give our customers the guarantee they buy an environmentally responsible product participating in the sustainable management of forests.
- TSCA Certified: Formaldehyde Emission Standards for Composite Wood Products (Division VI of the Toxic Substances Control Act).
